### RAMAKRISHNASAI WUPPALAPATI

**EMAIL** ramleo84@gmail.com **MOBILE** +91 9701977957 **LINKEDIN** www.linkedin.com/in/WRamakrishnasai **LOCATION** Hyderabad

- An achievement-driven professional offering expertise in data manipulation, analysis, reporting and data visualization; targeting challenging assignments in Data Science, Data Analysis & Machine Learning
- Consistently driving large-scale enterprise-wide assignments ranging from cost reduction & continuous process improvement to leveraging innovation, transformation & analytics in Business Intelligence and Data Analysis
- Proficient at **using the latest data and visualization tools and software** to provide the business with insights on customers and making recommendations for improvement
- Gained knowledge in the definition, development and evolution of data models, tools and capabilities
- Proven capable at evaluating the effectiveness & accuracy of new data sources and provided timely communications on significant issues and developments
- Successfully **displayed skills in enhancing data collection procedures** to include information that is relevant for building analytic systems
- Skilled at **processing, cleansing, and verifying the integrity of data used for analysis**, ad-hoc analysis & presenting results in a clear manner
- In depth understanding of collaborating with multi-disciplinary teams to understand business requirements for the products and projects

## CORE COMPETENCIES

Data Science & Analysis

Data Visualization

Capstone Project

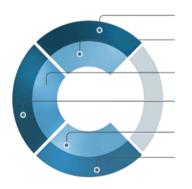

Data-Set Management
Statistical Analysis Program Execution
Data Mining & Insights

Business Intelligence

Machine Learning & Deep Learning

Model Deployment

### SOFT SKILLS

Change Agent

Collaborator

Communicator

Innovator

Planner

Thinker

### **EDUCATION**

**PG Diploma** in Data Science with a specialization in Deep Learning from IIIT-Bangalore (in collaboration with upGrad) in 2021 (3.7/4 Grade)

**Bachelor of Commerce** in Accounts and Economics from Mumbai University, Mumbai in 2005 (62%)

# CAREER TIMELINE

#### Machine Learning:

Performed-

#### EDA & Model Building:

- o EDA & Linear Regression Bike Sharing Dataset
- o EDA & Logistic Regression Telecom Churn Dataset
- Customer conversion rate prediction using Logistic Regression, Decision Tree Classifier, Random Forest Classifier, XGBoost Classifier, GridSearchCV, RandomSearchCV - SaaS Dataset
- o Customer Segmentation using K-Means Clustering, SMOTE Life Insurance Dataset and Term Insurance Dataset
- o Fraud Detection using Logistic Regression, Decision Tree Classifier, Random Forest Classifier and XGBoost, SMOTE and ADASYN - Credit Card dataset

#### Model Deployment on Flask & Heroku:

- Created a pipeline & deployed
  - o Linear Regression model Bike Sharing Dataset,
  - o Logistic Regression model Leads Conversion Dataset
  - o Advanced Regression model House Price Dataset
  - o Random Forest model SaaS Dataset
  - XGBoost model Telecom Churn Dataset

#### Docker:

- Containerizing-
  - Random Forest model SaaS Dataset
  - XGBoost model Telecom Churn Dataset

#### **Deep Learning:**

Performed CNN, RNN and Transfer Learning on Image Gesture Recognition dataset

# TECHNICAL SKILLS

- Machine Learning Linear Regression, Logistic Regression, Tree Based models (Decision Trees, Random Forest, XGBoost), Clustering (KMeans and Hierarchical), Support Vector Machines, K-Nearest Neighbors Classifier (KNN)
- Dimensionality Reduction Techniques PCA, LDA, Backward feature elimination, Forward feature construction, Recursive feature elimination
- Deep Learning ANN, CNN, RNN
- **Model Deployment** using Flask, Heroku and Postman
- Using **Docker** for containerizing ML models
- GCP- Associate Cloud Engineer Program
- Interpreting Blackbox models like Random Forest & XG boost using SHAP & LIME

#### PERSONAL DETAILS

Date of Birth: 17<sup>th</sup> Aug 1984

Languages Known: Telugu, English, Hindi, Marathi
